

Simisola Olubodun

Virtual Assistant | Administrative & Digital Operations

Lagos, Nigeria | +2348120827393 | ceemin19@gmail.com

Portfolio: <https://simiops.vercel.app/>

PROFESSIONAL SUMMARY

Virtual Assistant and digital operations professional with 4+ years of experience supporting businesses, projects, and teams through planning, documentation, research, digital systems, and workflow coordination. Experienced in organizing business information, developing processes, supporting day-to-day operations, coordinating projects, and turning ideas into structured, actionable plans. Brings a strong technical background that enables confident use of digital tools, independent troubleshooting, efficient research, and practical process improvement. Organized, proactive, detail-oriented, and comfortable managing multiple priorities in remote and fast-paced environments.

WORK EXPERIENCE

iRES (Incident Response Emergency System)

Lagos, Nigeria

<https://iresorg.com/>

Business Operations & Technical Project Coordinator

March 2025 – Present

- Coordinate business priorities, projects, workflows, and deliverables across an early-stage organization, using Notion, Google Workspace, Github, and collaborative project management workflows, which helped turn high-level objectives into actionable tasks.
- Develop and maintain operational documentation, service processes, internal resources, and workflow guides to support consistent execution.
- Coordinate communication between team members and stakeholders, ensuring requirements, decisions, deadlines, and follow-ups through Slack, email, and shared project documentations.
- Conduct research into tools, services, markets, and operational approaches to support business decisions and identify practical solutions.
- Organize and manage multiple priorities across product development, service planning, business operations, and team activities.
- Support business planning, service development, strategy, and process improvement through structured documentation, research, and collaborative workflows.
- Use technical troubleshooting and digital systems knowledge to independently resolve operational and technology-related issues.

Marcstefan Foods

Lagos, Nigeria Remote

Business Operations & Strategist

October 2025 – November 2025

- Planned and documented business operations using Google Docs, Google Sheets, and Notion, creating structured resources for planning, decision-making, and day-to-day execution.
- Conducted market and competitor research using Google Search, online documentation reports and AI assistants, supporting pricing, menu planning, positioning, and growth decisions.
- Developed and organized marketing and content strategies using Canva and Notion, supporting the brand's digital presence and customer acquisition.
- Supported menu planning, pricing, inventory considerations, vendor planning, and operational decision-making using structured spreadsheets and documentation.
- Organized business information, plans, and processes in Google Drive, creating an accessible digital workspace for ongoing operations.
- Supported the setup and management of the brand's **Chowdeck operations**, contributing to its expansion to **five active online store locations**.
- Coordinated multiple priorities across planning, research, documentation, marketing, and operations, ensuring strategic ideas were translated into practical execution.

EELI International

Technical Lead | Project & Administrative Support

October 2025 – November 2025

- Led the planning and delivery of a digital platform for an international NGO, coordinating requirements, content, integrations, testing, and launch activities.
- Organized website information and content workflows using Sanity CMS to support structured publishing and content management.

- Coordinated multiple project requirements and deadlines while maintaining communication with stakeholders throughout delivery.
- Managed digital communication and engagement workflows through Mailchimp, supporting organizational outreach and campaign activities.
- Integrated Paystack to support donation processing, communications, and digital engagement.
- Worked independently in a remote environment, troubleshooting issues, documenting processes, and ensuring deliverables were completed within agreed timelines.

XYKINE LIMITED
USA Remote

Operations & Workflow Support
March 2023 – Jun 2024

- Supported the development and improvement of a payroll management system, contributing to a **30% reduction in processing time**.
- Organized business information and workflow data through interactive dashboards, improving visibility and increasing user engagement by **20%**.
- Used GitHub and collaborative project workflows to organize tasks, track progress, coordinate changes, and support remote team collaboration.
- Worked with structured employee and payroll data, maintaining information accuracy and supporting reliable digital workflows.
- Coordinated tasks, issue resolution, testing, and project delivery with remote team members using digital collaboration tools.
- Researched and implemented technical solutions to workflow and system issues, contributing to a **25% reduction in project turnaround time**

EDUCATION
